

MICROLIFE CORE ESSENTIALS MICROCAPS

Build Your Nutrition Foundation for Lifelong Wellness

Superior Quality + Enhanced Delivery = Optimal Health

It's no secret that our modern food supply is fraught with dangerous ingredients from various forms of sugar to synthesized chemicals. Even those who make the best efforts to eat well fall short of an optimal diet. Specially formulated to fill in your nutritional gaps, Core Essentials is a superior-quality multivitamin and trace mineral complex that utilizes Advanced Delivery Technology for robust nutrient bioavailability, all of which helps you build a foundation for optimal wellness.

ADVANCED DELIVERY TECHNOLOGY

Superior absorption using our naturally structured, non-GMO liposomes & micronutrient encapsulation technology

The Liposome Advantage:

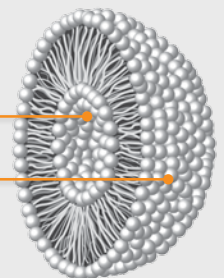

The problem with most traditional nutritional supplements is that their ingredients are combined with fillers, binders, and other additives, making them difficult to be recognized and absorbed by the body. They're also likely degraded by digestive fluids and enzymes in the digestive tract. The result? Only a small portion of nutrients reaches their intended cellular target. For consumers like you, this means money down the drain and frustration that the product is often not providing the results you're looking for.

Vasayo's proprietary Advanced Delivery Technology, on the other hand, effectively eliminates these obstacles to provide superior absorption using our naturally structured, non-GMO liposomes and micronutrient encapsulation technology.

Liposomes are double-layered "bubbles" or spheres comprised of lipids (fats) that surround and protect the nutrient. They pass through the digestive tract largely unobstructed and are easily absorbed into the bloodstream, where they quickly reach the cells that need them. The result is a dramatically higher rate of nutrient absorption and utilization by the body's cells.

Key Nutrients

Liposomes

Liposome layers form a "bubble" around the key nutrients, allowing the nutrient to bypass the destructive aspects of the digestive system and arrive intact directly to the cells for a much higher rate of absorption.

Features & Benefits:

Superior Bioavailability with Advanced (Liposomal) Delivery Technology:

Our proprietary liposomal-encapsulation technology ensures vastly improved nutrient delivery and absorption within the body over traditional supplements.

Fills Nutrition Gaps: Virtually everyone suffers from deficiencies in their diet. Core Essentials provides the nutrients where they're needed.

Comprehensive Benefits: This carefully blended formula delivers an impressive array of benefits spanning virtually every body system, including the nervous, cardiovascular, immune, glandular, digestive, and musculoskeletal systems.

Firm Foundation: Core Essentials helps users build a strong foundation for long-term health.

Enhanced Energy & Stamina: Core Essentials can help boost natural, sustained energy for a more productive lifestyle.

Key Ingredients:

Vitamin D: A crucial vitamin for the immune system, bones/teeth, and a healthy lifestyle.

Vitamin K: Needed for circulatory health, cardio function, and required for overall longevity.

B Vitamins: The benefits of this crucial family of vitamins is wide-ranging, from cardio health and brain function to nerve protection and immune activity. In addition, B vitamins are required to convert fats and carbohydrates into energy.

Selenium: Promotes glandular health and safeguards cell integrity.

Chromium: Supports healthy blood-insulin function as well as cardio health.

Molybdenum: Promotes optimal immune function while working as a catalyst in critical enzymes.

Trace Minerals: These lesser-known yet versatile minerals are needed for a wide array of body functions and systems.

How to Use:

Take 1 capsule daily, or as directed by your physician.

What the Science Says:

A Brazilian research team recently showed that supplementing with selenium helps promote the production and activity of key immune cells. - J Med Food. 2016 Jun;19(6):560-8.

Researchers from Western University of Health Sciences, in Pomona, California, recently determined that supplementing with vitamin D resulted in overall improved cardiovascular function. - J Pharm Pract. 2016 Oct 24.
